INSTRUCTIONS

1. Add a little water to thin down the color by adding 25% water to 75% paint.
2. Load up the brush with paint and then tap the end of the bristles on a paper towel to unload some paint from the tips.
3. Lightly sweep the brush on the plate going around in a circle. We want the paint to be streaky and messy to add texture.
4. Once the plate is covered in one coat, you're done! You can paint the back if desired.

TIPS

- Use the end of the brush with light pressure to get broken messy marks.
- One coat of paint is all that is needed so that the color is streaky.
- Any colors can be used for this technique.
